

Change Management

# Simplify change

The world is changing fast - and so are your business and regulatory landscapes. Adapt at the same speed.

## The solution

With Clausematch, you can get in front of the latest regulatory developments and market changes, collaborate, and manage change across your organization, without grinding operations to a halt — from initial assessment through to change implementation and attestation, all while evidencing compliance.

## Key benefits

### Adapt seamlessly

Smart, connected documents are a game-changer for companies who need to adapt at the speed of light. Clausematch allows you to granularly map and interconnect policies, procedures and other relevant documents to make sure you don't miss any required changes as a result of new regulations, obligations or a shift in strategy.

### Stay on top of compliance

Quickly adapt, with full audit trails, evidence of compliance across modifications and built-in attestation. Show regulators and key stakeholders what was updated, when and by whom. Make sure your policies and procedures meet both group and specific local obligations.

### Break down the silos

Clausematch's real-time editor allows you to seamlessly adapt to new regulations and business requirements, involving owners, editors and approvers from different business areas and functions, eliminating the endless back and forth of emails and the challenge of managing conflicting document versions.

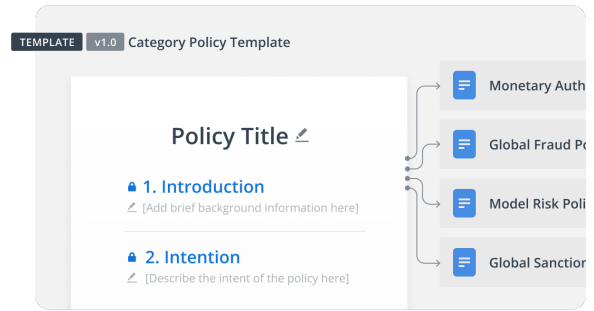

### Demonstrate governance

Integrate risks and controls frameworks. Create a dynamic governance map for all policies, procedures, and controls, in a single repository.

# Key features

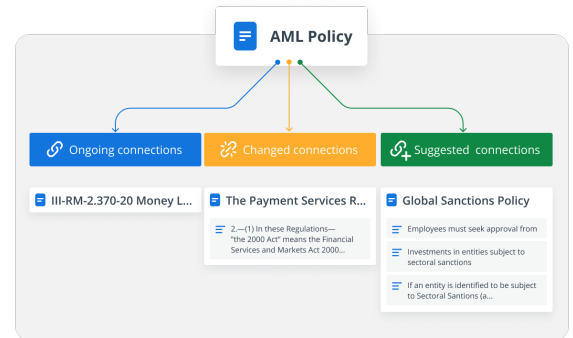

## Automate and standardize

Assess change and translate it into action with Clausematch. Enforce consistency and reduce time to refresh documents, with pre-approved templates and real time, digitized processes that are fully-tracked.

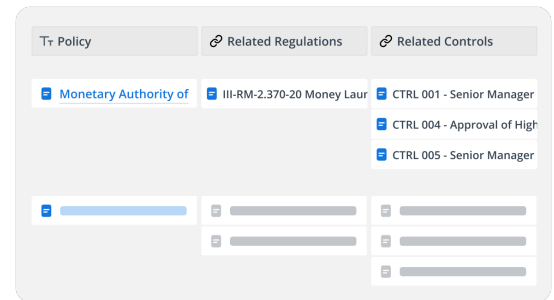

## Intelligent mapping

Connect policies, procedures and other relevant documents, down to a paragraph level, to stay on top of regulatory and business updates. Understand inter-dependencies and guarantee compliance at all times, across all documents.

## Evidence compliance

Generate real-time reports to demonstrate compliance to management, auditors and regulators, at the click of a button.

“I love that you can’t make edits offline or edit a paragraph that someone else is working on - it’s physically impossible to create conflicting changes, which is so important when you need a very precise audit trail.”
